

Decision about of cancelation of TASK #11

Dear pilots, after several hours of thinking and consulting with my staff, I decided to cancel the Task #11.

In my opinion, meteo situation was unsafe to accomplish this task in safe and fair way. The fog, moved to this area rapidly, created dangerous and unfair situation for pilots. Taking in account that it was physical task with marker drops, and additionally, target was significantly moved from provided coordinates, several pilots, due to bad visibility, had no chance to approach to target at all or in safe way. Because of that I am going to use my right (R.8.2.2) to cancel this task. Rest tasks stay as they are, because they were virtual and visibility didn't affect the results.

According that, task #12 become #11, Task #13 changing to 12, Task # 14 to 13, Task # 15 to 14, Task # 16 to 15 and Task # 17 to 16
