

General Briefing Notes – Early Birds 2.0 **(Worldwide balloon competition)**

-You can only make 1 official competition flight in each slot. The flight is valid when you have entered the token, the track is registered, and you send us your Flight Report Form.

-You will receive a token (=code) to activate the flight in the Balloon Life App. This personal token will be the same for all flights during this competition. Make sure you do not lose this token as you have to enter this into the Balloon Life App before every competition flight. This token is necessary to make a valid competition flight.

-You can entry this competition any time. Even when you missed the first slots. Be aware it can take a few days before you receive the token to use in the Balloon Life App. Without your personal token, you can not make a valid competition flight.

-Reminder; At all time you have to mark your launch position in **Marker #1** into the Balloon Live App. This is different comparing to competitions as we knew them before!

-After your flight, you have to complete the Flight Report Form and send this ASAP to Erwin@dbcc.nl. This Flight Report Form is necessary to calculate your results. Without this Flight Report Form, we can not give you a result.
You can download this document at the ENB of watchmefly.net.

-We will calculate the results on the pilots competed/slot. If only 40 out of 70 pilots have flown in slot #1, we will score them on 40 pilots.
Pilots who have not make a flight in a certain slot, will receive 0 (zero) points to that competition flight.

-The total results are based on your 5 best flight. The 5 best flight will be your 5 best average results /flight.

-We recommend you to check these notes before every competition flight.

-At all time, you need to complete to the COVID-19 restrictions applied to your country or region!

Good luck, have fun and keep it safe!

Jonas Maes & team
